### **DETAILED ACTION**

1. This Office Action is in response to the AMENDMENT entered on March 10, 2003 for the patent application (09/583,734).
2. The amendment to the claims of the current application overcomes the Double Patenting rejection, therefore, the double patenting rejection is withdrawn.
3. The present patent application claims priority from domestic US Application 60/137,513 filed June 2, 1999.
4. The submitted Information Disclosure Statement is considered.
5. Status of the claims - claims 1-22 are pending.

### ***Claim Rejections - 35 USC § 102***

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

7. Claims 1-22 are rejected under 35 U.S.C. 102(a) as being anticipated by "Chatting in Style," University of North Carolina at Chapel Hill, School of Information and Library Science, Fall 1998 (10/7/1998).

ICQ, as disclosed in "Chatting in Style" is an application that is used as a tool for communication. After installing this software application in a computer, ICQ allows you to know who is online (network), and allows you to contact them by clicking the name or the icon next to

Art Unit: 2173

---

it and then send a message, initiate a chat session or launch any other interactive session (communication mode). ICQ automatically detects user connection to the Internet and announces your presence (on-line status indicator) to those whose list (contact list) you are on and notifies you if your contacts are on-line (status indicator) as well. This status indicator is color-coded symbol (flower icon), i.e, it changes to green to announce your presence to those whose list you are on.

Moreover, as described below, it is clear that the current claims are not distinguishable over the cited art.

Per claim 1:

As per "user indicator presentation means," ICQ does provide this limitation, such as name, ICQ's unique ID number, and etc that are associated with the user. as mentioned above these indicators allows you to connect or link to others by clicking on the indicator.(see page 2).

As per "status presenting means," as mentioned above, ICQ provides the status indicator (such as online or offline) and the user indicators (such as name or ID) in the window in order to provide the status of selected (by clicking name indicator) system users (see page 2).

as per "communication means," ICQ allows you to contact other ICQ users on the Internet by clicking the name (identifier) or the icon next to it and then send a message, initiate a chat session (real-time) or launch any other interactive session

(communication mode).

The remaining independent claims, 6, 10, 15 are rejected for the same reason given to claim 1. Claims 21 further calls for "a user indicator presentation module" associated with a first system application and a status determining module associated with a second system application, wherein, the first and second system applications are different system applications. ICQ also teaches the above limitations, wherein status can be associated with e-mail, chat or data conference applications that determines a status of a user associated with the user indicator (see pages 1-6). Claim 22 further calls for "a status determining module," ICQ does provide plurality of status determining indicators to know the status (online, offline, etc.) of one or more users on the Internet.(see page 2), wherein different applications (such as voice, data sharing application) could be associated with the status of the user (page 1-6).

as per claims 2, 4, 5, 7, 9, 11, 13, 14, 16, 17, 19 and 20, ICQ, as mentioned above, does provide several communication mode to a user including e-mail, chat, send and receive message files and URLs, play games, draw on whiteboards, data conference, and communicate through voice while surfing the net (see page 1). User can initiate or establish any one of the communication mode he/she prefers and share at least one application with one or more users (see pages 1-6).

as per claims 3, 8, 12, 18, ICQ automatically updates the user's status (such as online) during connection to the network. After establishing connection user can also customize, change/update their status (see page 2).

***Response to Arguments***

8. Applicant's arguments filed March 3, 2003 have been fully considered but they are not persuasive. Applicant argues that the feature of presenting one or more user indicators as links within at least one electronic document is not shown. In contrast to the argument ICQ, as disclosed in "Chatting in Style" displays user indicators (page 2) that are selectable, like a link to communicate with the selected network user (page 2, Dave for example).

**Conclusion**

9. On June 9, 2003, Examiner called the applicant to clarify the following claim language, "a user indicator presentation module associated with a first system application" and "a status determining module associated with a second system application". The examiner thanks the applicant for clarifying the above limitations. As clarified by the Applicant, "a first system application" could be for example, a chat and a second system application could be an e-mail application.

10. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period

Art Unit: 2173

---

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
